APPLIED DB PUBLIC COMPANY LIMITED

R&D and Product Sustainability Policy

R&D and Product Sustainability Policy

Applied DB Public Company Limited is committed to research and development of PVC Compound and related products to create value for customers, stakeholders, society and the environment while strengthening competitiveness and long-term business sustainability. The Company integrates Environmental, Social and Governance (ESG) principles and the Sustainable Development Goals (SDGs) into research, development and product stewardship.

1) **Sustainable Innovation** Develop quality and safe products and technologies that meet customer needs and create business value, while considering resource efficiency, environmental impact and the product life cycle.
2) **Product Safety & Compliance** Give priority to product safety, applicable laws, standards, customer requirements, and chemical and environmental requirements, applying the principle of Compliance by Design from the R&D stage.
3) **Responsible Materials & Product Stewardship** Promote responsible material selection, reduction or substitution of substances of concern, efficient resource use and products supporting Circular Economy, considering impacts from raw materials and manufacturing through customer use and end of life, as appropriate.
4) **Product Information & Technical Service** Provide accurate, sufficient, transparent and verifiable product information through appropriate channels including the Company website, TDS, SDS, Product Specification, Sales and Technical Service, as well as technical consultation and customer training. Product information shall be reviewed and updated, and technical, safety or environmental claims shall not exceed available evidence, test results or recognized certifications. Confidential information and intellectual property shall be appropriately controlled.
5) **Customer Responsibility & Continual Improvement** Provide responsible technical service, listen to customer needs and feedback, and use relevant information to continually improve products, processes and innovation.
6) **R&D Governance & Integrity** Conduct R&D with scientific integrity, ethics, transparency and data integrity, with due attention to Risk Management, Regulatory Compliance, Intellectual Property and Confidentiality.

ESG & SDG COMMITMENT

E – Environmental: Sustainable Materials • Resource Efficiency • Circularity • Climate / Carbon Reduction

S – Social: Product Safety • Customer Responsibility • Technical Service • Responsible Product Information

G – Governance: Compliance • Data Integrity • Responsible Claims • Risk Management • IP Protection

Supports relevant SDGs, particularly SDG 3, 8, 9, 12, 13, 16 and 17.

"ADB is committed to responsible innovation and sustainable product development by integrating ESG considerations into research, development and product stewardship, creating long-term value for our customers, stakeholders, society and the environment."

This policy on R&D and Product Sustainability. The Board of Directors' Meeting No.5/2026 on 9 November 2026 assigned the Chief Executive Officer to sign, approve and announce it for use within the Company, effective from 12 November 2026 onwards.

Pawat

(Mr.Pawat Wongtangtrakul)

Chairman of the Board
